

# FLEX SUBLI-LIGHT

Flex Subli-Light is our NEW answer to producing single colour designs on sublimated or heavily dyed polyesters. Developed with an exclusive silver carbon anti-migration layer, Flex Subli-Light stops the garment dye from discolouring the transfer - a common issue with heat applying transfers onto sublimated or heavily dyed polyester sportswear.

This ultra thin material features a very low tack carrier, ideal for weeding larger designs.

## RECOMMENDED FABRICS

- Cotton
- Polyester
- Cotton/Polyester Blends
- Sublimated Fabrics & Lycras (not a stretch vinyl)

Please note: Always check fabric makeup and test press when possible.

## TECHNICAL INFORMATION

**Thickness:** 95 Microns

**Finish:** Matte

**Carrier:** Medium/High Tack

**Rating:** OEKO- TEK Standard 100 Certified

## WASHING INSTRUCTIONS

- Avoid washing in the first 24 hours
- No higher than 40°C
- Do not dry clean or tumble dry
- Hang dry inside-out
- Avoid over exposure to direct sunlight

## FOR USE WITH

- Commercial Heat Press
- Vinyl Cutter
- Weeding Tool

## CUTTING NOTES

**Blade:** Standard Cutting Blade (45°)

**Pressure:** From 60g (New blade)

**Recommended cut size:** 5mm Text (for fast weeding)

**Please note:** Always test cut prior to any production. Remember cutter settings will need to be adjusted between products and as your blade ages.
